

A 3x4 grid of 12 torus plots. Each plot shows a torus with a central white circle and a black outer boundary. The torus is filled with a complex pattern of red, blue, and green contours. The contours are arranged in a way that suggests a periodic or quasi-periodic structure, with some regions showing more intense colors (red and blue) and others being green. The patterns vary slightly between the rows and columns, but all exhibit a similar overall structure.
