

2ND SOFT TISSUE MODELLING WORKSHOP

June 10-12, 2015 @Glasgow

One of the greatest challenges in mechanical modelling is to extend its success to fields outside traditional engineering, in particular to biology, biomedical sciences, and medicine, where many new challenges are solved with new methods and new models. Following the successful 1st Soft Tissue Modelling Workshop in 2012, Glasgow, this 2nd workshop will continue the research forum among the researchers, to communicate the most recent advances in the field of soft tissue modelling, with particular applications, though not exclusively, to soft tissues in cardiovascular systems.

Plenary Speakers

RW Ogden, FRS, C Berry, UK

G. Holzapfel, Austria, J. Humphrey, USA

A. Menzel, Germany, M. Ben Amar, France

D. Ambrosi, Italy

Organizing committee

Xiaoyu Luo, Hao Gao, Nicholas Hill, Glasgow, UK

Boyce Griffith, USA, Paul Watton, Sheffield, UK
